SCOOTER

 **YAMAHA**

Dark Metallic Blue

# TMAX

## WITHOUT LIMITS

Featuring 495cc's of fuel-injected twin-cylinder power, huge 43mm fork and 2-up seating, the new TMAX is no ordinary scooter. Whether commuting in the city or touring the Rocky Mountains, the TMAX offers serious performance and comfort. A huge underseat storage compartment and a fully automatic transmission provide unmatched convenience while an aluminum frame, R6-inspired brakes and 15" wheels highlight its motorcycle handling and heritage. Discover why the TMAX is the flagship of Yamaha's scooter line-up.

## Sleek Design

Sculpted bodywork wraps around the TMAX's high-tech aluminum frame, with integrated turn signals and convenient passenger grab handles.

## Instrumentation

TMAX's all-inclusive cockpit display keeps you on top of all systems, including kilometres ridden since last oil change and V-belt wear indicator light.

## Quiet and Clean

An environmentally friendly catalytic converter and closed loop fuel injection system keep the TMAX running smoothly and efficiently.

## Bright Lights

Dual 'cat eye' sport-inspired headlights provide plenty of visibility ahead of the spacious, weather-beating cockpit.

## Keep it Smooth

A piston-type engine counter-balancer quells vibration for maximum rider and passenger comfort.

*BWS 125 - Yamaha Blue*

# BWS 50 & 125

## EVEN MORE OF A VERY GOOD THING. ZOOM ON.

The newest and largest member of the BWS family, features a 124cc, low-emission, fuel-injected, four-valve, four-stroke engine that provides an amazing 37 kilometres per litre (105 mpg)\* fuel economy. With its telescopic front fork, fat tires, large underseat storage and rugged attitude, the BWS 125 is designed to move you and a friend in style and comfort for years to come.

Or choose the original BWS 50: tough, reliable and aggressive, its willing 49cc, two-stroke, Autolube-injected engine and off-road-inspired running gear are ready to go just about anywhere – at up to 52 kilometres per litre (145 mpg)\*.

### Cockpit Control

The BWS 125's easy-to-read analogue speedometer is flanked by a fuel gauge and indicator lights.

### Fuel-efficient and Green

A catalytic converter and closed loop fuel injection system with an oxygen sensor inside the BWS 125's muffler keep emissions low, fuel economy high and sends the fun factor right off the scale. We didn't forget the ever-popular BWS 50, it has a catalytic converter to reduce exhaust emissions too.

### Easy as twist-and-go

Fully automatic transmission and push-button electric starting add to the BWS super-convenience.

# Majesty

## ROAD ROYALTY

The 2009 Majesty pumps out the power of a motorcycle from its 395cc engine, but is brimming with comfort and conveniences typically found on a scooter. Offering a fully automatic transmission, a comfortable riding position, great weather protection and tons of room for a passenger, the Majesty breaks the traditional scooter mould. Fully highway capable, the Majesty is a miser at the pumps thanks to its 21.5 kilometres per litre (61 mpg)\* fuel economy.

## Bring It

In addition to the huge 60-litre underseat compartment, there's even more storage inside the Majesty's full-coverage front fairing.

## Ultimate Convenience

A convenient flip-type parking brake reinforces the easy-to-operate theme highlighted by the Majesty's fully automatic transmission, choke-free fuel injection and electric starting system.

## At a Glance

The Majesty features a weather-beating cockpit, highlighted by a centrally located instrument panel. Functions include analogue speedo and tachometer plus a digital odometer, dual tripmeters, fuel tripmeter, fuel gauge, outside air temperature and coolant temperature. A V-belt wear indicator light and an oil change warning light complete the package.

Dark Metallic Grey

# C3

## THINK ON TOP OF THE BOX.

That funky cube shape gives the C3 great storage capacity – about 34 litres worth – and emphasizes its unique, fun-inspired styling. Powered by a liquid-cooled, 49cc, fuel-injected, four-stroke engine that gets up to 49 kilometres per litre (138 mpg)\*, the C3 is perfect for urban commuting or just zipping around town. Big rugged tires, motorcycle-style fork and that peppy engine mean it's a hoot to ride too.

## Sporty Plush

A hydraulic fork up front and a single shock at the rear, along with wide tires on 10-inch wheels, serve up a nice, smooth ride.

## Fully Informed

Speedometer, odometer, fuel gauge, high beam indicator and engine management indicator lights are all here.

## Fun Has Never Been So Easy

Fully automatic, V-belt transmission ensures easy 'twist-the-throttle-and-go' operation. There is no clutch or gear shifting to worry about.

## Stop on a Dime

Front and rear drum brakes supply strong, reliable stopping power. They are hand operated for ease of use... just like a bicycle.

\*Your actual mileage may vary. Fuel consumption figures are based on 40 km/hr speed on level ground.

Vespa

Vino 50 - Metallic White

# Vino 50 & 125

## THE WHOLE PACKAGE

Here's everything you want in a scooter! A peppy ride, Euro-inspired retro styling, clean four-stroke performance and incredible fuel economy. The Vino 125 is powered by a 124cc engine that gets up to 41 kilometres per litre (115 mpg)\* while the Vino 50's powerhouse is a smaller 49cc, clean-burning four-stroke delivering up to 47 kilometres per litre (132 mpg)\*. Both feature fully automatic transmissions and super low-maintenance drive systems. They've also got plenty of underseat storage for whatever you may need to take along on your daily commute.

## Easy to Use

Fully automatic, gas-it-and-go transmissions, hand-operated brakes just like on a bicycle and wide front splash aprons offer excellent convenience and rider comfort.

## Quick and Easy

Easy, dependable, push-button electric starting with backup kickstarters and fully automatic chokes make getting started a breeze.

## Take it Along

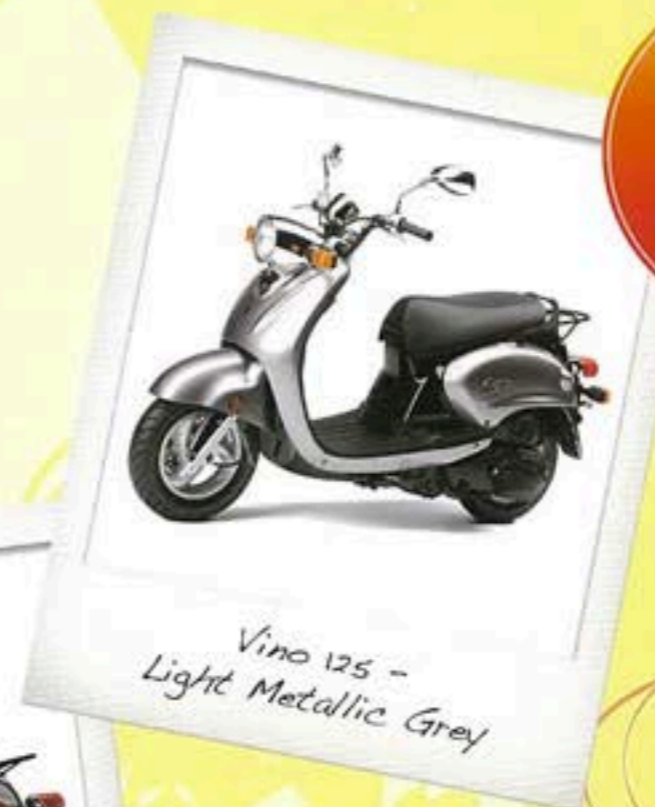

Huge underseat storage compartments can hold a full-face helmet while a rugged rear rack is perfect for hauling school books or groceries.

Protection Plus

There are few joys in life equal to the free-spirited thrill and experience of motorcycling. And that's why it's important for all of us to do our part as responsible riders. By following logical common-sense rules, we can maintain season after season of unparalleled enjoyment of our sport. Always remember to review your Yamaha Motorcycle Owner's Manual. Before each ride, take time to check all your equipment. Always wear an approved helmet, eye protection and proper riding apparel. Always be sure your bike is in first-class condition before riding. Keep it well-maintained and always outfitted in accordance with provincial and municipal laws. Every scooter rider should be aware of the limits of his or her skills, experience and abilities and ride accordingly. Beginners should be extremely cautious and allow extra time and distance for manoeuvring and braking. All riders should ride well within the limits of their abilities, never beyond them. Always ride in a responsible manner, respecting the environment as well as all provincial and municipal laws. Do not drink and/or use drugs and ride, it is illegal and dangerous. Yamaha encourages all scooter riders to practise defensive riding and enroll in a recognized safety training course. All information, specifications and appearance of Yamaha products shown herein are subject to change without notice. See your local dealer for the most up-to-date details.
